Hotel De Verbier Partners With Intility To Enhance Their In Room Guest Experience

Our Partners [Q](#)29 OCT 2020 / [Places](#)

INTELITY (<https://bit.ly/3jDA1Mn>) the developer of hospitality's most comprehensive guest experience and staff management platform, announced that its partnership with Hôtel de Verbier in Verbier, Switzerland. The four-star property nestled in the majestic Swiss Alps will deploy key elements of the INTELITY platform, including beautiful 10" tablets for contactless in-room dining, a full digital compendium, amenity and activity reservations, messaging, and more, along with INTELITY's staff operations solution, GEMS, to drive overall convenience and optimized operations.

"Hôtel de Verbier delivers excellent service and flexibility to every guest who stays with us," said Ebba Leijonhufvud, Director of Hôtel de Verbier. "Our top priority is to ensure our guests have swift access to all of our rich amenities at the tip of their fingers, either on property or off. There is so much to do in our leading Swiss Alps resort and we want to ensure it's seamlessly offered to all of our guests."

Hôtel de Verbier is a newly renovated boutique hotel with a 4* superior categorization, conveniently located on Place Centrale, at the very heart of Verbier. Visitors can enjoy the charm of the village directly from their doorstep, with plenty of shops, restaurants, and amenities. All of the 29 rooms have mountain views, free WiFi, exclusive beds and bedlinens, and high-end tea/coffee making facilities. Hôtel de Verbier has unique activities during every season for guests to immerse themselves in nature, whether it's skiing, biking, or participating in Verbier's celebrated music festival

The INTELITY platform's tablets are well regarded as the best in the industry and will create a convenient, full-flow digital experience for the guests staying on property. Guests will be able to use the tablets for on-property services and amenities, like contactless dining or booking spa appointments after a long day on the slopes, or off-property services like making reservations for ski school and equipment. Then, when it is time to check out, they can simply exit from an easy 'check-out' button on the tablet.

INTELITY is the global provider of the most advanced hospitality technology platform for the hotel, casino, cruise, and luxury residential markets. INTELITY offers its customers comprehensive, fully integrated solutions to better connect and manage their guest experience and staff operations in a single platform. INTELITY has been named the "Official Mobile and In-Room Technology Provider" by the distinguished Forbes Travel Guide in 2018, 2019, and 2020, and is in use by major hotel groups, including Marriott, Fairmont, Four Seasons, and more.

"INTELITY is honored to partner with Hôtel de Verbier, one of the top hotels in the Swiss Alps," said Robert Stevenson, CEO of INTELITY. "The property itself is impeccably designed and perfect for any traveler looking for a cozy, boutique resort that provides all comforts and technology we're used to having in our lives. I personally can't wait to visit and enjoy everything the hotel and its surroundings have to offer."
